

Claude Metellus

Data & Business Intelligence Analyst

Coincy, France | mclauderly@gmail.com | +33 7 58 00 32 45
linkedin.com/in/claude-metellus | github.com/MCOSK

PROFESSIONAL SUMMARY

Highly analytical and results-driven Data & BI Analyst with a strong foundation in Applied Mathematics and Stochastic Modeling. Proven ability to build Automated ETL pipelines, query complex databases using SQL, and ensure data integrity in high-stakes environments. Transitioning real-world logistics tracking and quality assurance experience into actionable business intelligence. Seeking a junior BI role to leverage data modeling, Python programming, and data visualization skills to drive strategic corporate decisions.

TECHNICAL SKILLS

- **Data Processing & Databases:** SQL (PostgreSQL, MySQL), Data Cleaning, ETL Pipelines, Relational Databases.
- **Programming Languages:** Python (Pandas, NumPy, Scripting), R, $\text{\LaTeX}$.
- **BI & Data Visualization:** Power BI, Tableau, Advanced Microsoft Excel (Pivot Tables, VLOOKUP).
- **Mathematics & Analytics:** Statistical Modeling, Probability Distributions, A/B Testing, Predictive Analysis, Risk Assessment.
- **Tools & Methodologies:** Git, GitHub, WMS/ERP Systems, 5S Methodology, Quality Assurance Auditing.
- **Languages:** English (Professional Working Proficiency - B2), French (Native).

DATA & ANALYTICS PROJECTS

Automated ETL Pipeline & Data Extraction | *Python, Pandas* 2026

- Engineered a robust Python script to automatically extract, clean, and structure raw data from hundreds of unstructured PDF documents.
- Transformed unstructured inputs into clean CSV/Excel databases ready for analytical querying, significantly reducing manual data entry time.

FinTech Application Data Architecture | *Tap Cash* 2026

- Designed the functional data architecture and transaction flow models for a digital payment and mobile transaction application.

Quantitative Finance & Fund Structuring | *10/28 CAPITAL* 2026

- Developed advanced financial models and risk assessment frameworks for a conceptual capital management and investment firm.
- Applied stochastic calculus and predictive modeling concepts to simulate market strategies.

PROFESSIONAL EXPERIENCE

Logistics Data & Flow Validator | *Carrefour*
Carpiguet, France

Jul 2022 – Sep 2024

- Processed and validated real-time supply chain data flows using digital WMS/ERP terminals in a high-volume logistics environment.
- Reconciled database records with physical inventory, systematically identifying and resolving data discrepancies to ensure 100% order accuracy.
- Optimized operational workflows under strict time constraints, ensuring timely delivery execution.

Quality Assurance & Process Operator | *PSA (Stellantis)* *Apr 2025 – Jul 2025*
Cormelles-le-Royal, France

- Conducted systematic quality audits on automotive production lines operating under a strict "Zero Defect" policy.
- Acted as an anomaly detector: identified, qualified, and isolated production deviations, reporting key metrics to senior management.
- Strictly applied 5S quality assurance protocols to maintain operational excellence and mitigate industrial risks.

EDUCATION

Master of Science in Mathematics and Applications *Expected Jan 2027*
Université de Lorraine, UFR MIM – Metz, France

- **Core Coursework:** Stochastic Modeling, Scientific Computing, Advanced Probabilities, Statistical Algorithms, Operations Research.

Bachelor of Science in Mathematics *2021 – 2025*
Université de Caen Normandie – Caen, France

- **Core Coursework:** Linear Algebra, Numerical Analysis, Integration Theory.
